Professional Summary

Software Engineering student at Swinburne University with previous software engineering internship experience and hands-on experience developing full-stack web applications. Skilled in C#, ASP.NET Core MVC, SQL, React and Git, with exposure to cloud technologies, AI, networking, software testing and deployment. Interested in applying emerging technologies to solve practical business problems while continuing to develop experience in web and software development.

Education

2024 – Expected July 2027 **Bachelor of Engineering (Software)**
Swinburne University of Technology

Completed December 2023 **Diploma in Information, Communication & Technology (Software)**
Asia Pacific University of Technology & Innovation

Experience

Nov 2024 – Present **Retail Assistant**
Australia Post

- Provide excellent customer service in a fast-paced retail environment.
- Process parcel lodgements, collections and retail transactions accurately.
- Assist customers with postal, banking and identity verification services.
- Handle cash transactions and maintain accuracy in daily operations.
- Work collaboratively with team members to ensure efficient store operations.

Sep 2023 – Dec 2023 **Software Engineering Intern**
Asia Pacific University of Technology & Innovation

- Contributed to the development and maintenance of full-stack web applications using Vue.js (Vue 3), PHP and the Laravel framework.
- Developed and updated frontend components and user interfaces with Vue.js, integrating them with Laravel-based backend functionality.
- Worked with MySQL databases using phpMyAdmin, supporting data management and database-driven application functionality.
- Used Git and GitHub for version control, managing code changes and collaborating on software development tasks.
- Performed debugging, testing and troubleshooting across frontend and backend components to identify and resolve application issues.

Projects

ServiceHub – Full-Stack Service Booking Platform (React, ASP.NET Core & PostgreSQL)

- Developed a full-stack service booking platform using React, TypeScript, ASP.NET Core Web API (.NET 10), Entity Framework Core and PostgreSQL.
- Implemented JWT authentication, role-based authorization, business profiles and service management for business owners and customers.
- Built appointment booking and availability features, including time-slot calculation, booking cancellation and prevention of overlapping confirmed bookings.

JobQuest – ASP.NET Core MVC Job Portal

- Developed a multi-role job portal supporting Job Seekers, HR staff and Administrators using ASP.NET Core MVC, Entity Framework Core and SQL Server.
- Implemented authentication, job applications, resume uploads, search functionality and role based access control.

Portfolio Website – React & Tailwind CSS

- Designed and deployed a responsive portfolio website showcasing projects, technical skills and professional experience.
- Built reusable React components, implemented modern UI design with Tailwind CSS and deployed through Vercel.

Skills

FRONTEND

HTML5, CSS3, JavaScript, TypeScript, React, Vue.js, Bootstrap, Tailwind CSS

BACKEND & DATABASES

ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, ASP.NET Core Identity, Laravel, JWT Authentication, SQL Server, MySQL, PostgreSQL, REST APIs

PROGRAMMING LANGUAGES

C#, Python, Java, Kotlin, PHP

CLOUD & DEVOPS

AWS, Microsoft Azure, CI/CD, Git, GitHub, Vercel
